

CHALLENGE YOURSELF TO NEW HEIGHTS

Aviation Technology At St. Robert C.H.S.

This program provides students with the opportunity to explore many area of Aviation Technology including Aviation Maintenance, Engineering and Pilot Training. Units of study include theory of flight, aerodynamics, components of aircraft and their functions, power plants, navigation and meteorology.

Throughout the course students will have the opportunity to be involved in the construction of a real airplane, a Zenith CH-601 Zodiac.

This program will also provide students with the chance to explore careers in the Aerospace industry through various field trips, industry visits and guest speakers. This will enable students to make informed decisions about post secondary education, work or apprenticeship.
